Genesystel
YOUR ONE-STOP TELECOM GENIE

Service Description:

nbn™ Enterprise Ethernet is an end-to-end direct fibre service from end-user premises back to NBN Fibre Access Node (FAN), with bandwidth starting from 10Mbps to close to 1000Mbps symmetrical service*.

Availability:

Only available in NBN enabled Footprint/zones. Your address must be pre-qualified before a formal quotation can be provided.

Equipment Requirements:

You'll need a compatible router or firewall at your premises. You can choose our managed router option in which case we will supply and manage the router for you, or you can choose our non-managed option in which case we will supply the router for you but it will be managed by you.

Class of Service:

TPG nbn™ Enterprise Ethernet supports two NBN CoS levels: Low and High. Low CoS delivers traffic as Excess Information Rate (EIR) and as such is "best efforts" only, while High CoS delivers traffic with a Committed Information Rate (CIR) only, intended to support services that demand low latency, jitter and loss tolerance. More information on the CoS can be found at www.nbnco.com.au/business/pro
