

Service Description:

Fibre1000 IP-Line offers a symmetrical 1000Mbps fibre-optic connection to the TPG network, inclusive of unlimited internet access.

Availability:

Availability is limited to TPG on-net buildings. Before receiving a formal quotation, your address must undergo a pre-qualification process.

Equipment Requirements:

To utilize this service, you'll need a compatible router or firewall at your premises. You have the option to select our managed router service, where we supply and oversee the router for you. Alternatively, you can opt for the unmanaged option, in which case we will provide the router, but you will be responsible for its management.
